1) Please check that green light USB key is on. If the lights are off, the USB key is damaged and needs to be replaced. If so, please contact your local sales manager. 2) This issue can be caused by a iKey driver problem. Please download the latest version of the iKey driver from ABBYY Share and follow the instructions below to install it. a) Remove the old driver (Control Pannel - add or delete programs), b) restart the computer, c) install a new driver. 3) For ABBYY FineReader Engine 9.0 and earlier SafeNet iKeys is not visible through a remote desktop or connection to the terminal server. However, if the service app is used to provide access to the key, it will be visible through a remote desktop connection. 4) There is a known hardware key problem on Windows Server 2003/Windows Server 2008/Vista/Windows7 and on some HP machines. The iKey key may display erratic performance or stop working altogether. According to SafeNet engineers, this problem occurs when the iKey driver works in PCSC mode, which uses the smart card service (scardsvr.exe). All the latest versions of the iKey driver do this. Installing a driver in a mode not posted in the PCSC (which does not use the Smart Card service) should solve this problem. To install the driver in a non-disconnected PCSC mode, start the installer from the VR-OFF command line. To do this, please follow the following steps: Remove your current driver: go to the control panel → Add/Delete programs, find the Safenet iKey driver on the list and remove it. Reboot your computer. 5) USB key may require multiple utilities and programs (such as eToken PKI Customer 4.0, SAP Logon and ikeyACR.exe). However, the key can only be used for one program at a time, so you have to discontinue all utilities. If the problem persists, please contact us. Device ID Search Info: Model: SafeNet Rainbow iKey 1000 Drivers Supplier: SafeNet Version: 4.1.1.10, v.4.1.1.7, v.1.21.0.5 Operating System: Windows XP, Windows Vista, Windows 7 Bits: 32-bit (x86), 64-bit (x64) Driver Date: 2009-10-29 Size: 2.9 mb Driver Description Download Driver SafeNet Rainbow iKey 1000 Drivers version 4.1.1.1.10, v.4.1.1.7, v.1.21.0.5 for Windows XP, Windows Vista, Windows 7 32-bit (x86), 64-bit (x64). 32-bit iKey_Driver_v4.1.1.7.zip - Automatic installation, 32-bit (2.9 mb)64-bit iKey_Driver_v4.1.1.10.zip - Automatic installation, 64-bit (1.3 mb)SafeNet_Inc.-1.21.0.5.zip - manual installation (0.19 mb) Link to file: Please respond to bonpoc USB-VID_04B9\PID_1000 Rainbow Technologies, Inc. iKey 1000 TokenUSB-VID_04B9-PID_1001 Rainbow Technologies, Inc. iKey 1200 TokenUSB VID_04B9-PID_1002 Rainbow Technologies, Inc. Rainbow iKey 4000iKey\iKeyEnum iKeyEnum iKeyEnum-iKey\IFD End of support iKey Dongles FineReader Engine successfully supports hardware protection with USB keys SafeNet iKey 1000 and iKey 1032. Due to changes in license protection technology, SafeNet (formerly Rainbow Technologies) has halted further development of the technology used by iKey. SafeNet has not provided any significant updates to the iKey driver since a few years. Microsoft's latest operating systems are not properly supported by iKey Keys and its driver, especially the lack of proper, reliable 64-bit support is a pain for ABBYY developers and customers. The requirements for the key as equipment have also changed. The iKey 1000 has a capacity of only 8KB and iKey 1032 is 32KB. This does not meet the needs of our customers today. In the medium term, support for Safenet's iKey keys is likely to end. ABBYY can still supply and replace iKey keys for customers who deploy their applications with this type of hardware protection for a certain time (at least until the end of 2015). Alternative Safenet Drivers The latest version of the Safenet authentication client is now available and can be downloaded directly from our website as follows: for Windows for Linux RPM (Red Hat Package Manager) for Linux Debian What GlobalSign products require SafeNet drivers? GlobalSign PDF and EV Code signature certificates are installed on USB tokens and require drivers to work. Download links for different operating systems can be found below. Windows Support SafeNet Version Windows XP Windows Vista 7 Windows 10.8 X X X X X X 8 and 7 64-bit GlobalSign SAC Win x64 v10.8 32-bit GlobalSign SAC Win x32 v10.8 10, 8 and 7 64-bit GlobalSign SAC Win x64 v10.7 32-bit GlobalSign SAC Win x32 v10.7 Windows: 10, 8th 7 64-bit GlobalSign SAC Win x64 v10.4 32-bit GlobalSign SAC Win x32 v10.4 Legacy Drivers: Windows: XP and Vista 64-bit GlobalSign SAC Win x64 v9.0 32-bit GlobalSIGN SAC Win x 32 v9.0 Linux Version Support SafeNet Version Linux RPM (Red Hat Package Manager) Linux Debian 10.7 - Downloads Current Drivers: Linux RPM (Red Hat Package Manager) 64-bit GlobalSign SAC Linux x64 v10.7 32-bit GlobalSign Linux x3 2 v10.7 Linux Debian 64-bit GlobalSign SAC Linux x64 v10.7 32-bit GlobalSign SAC Linux x32 v10.7 Mac

If you have any of the following problems with the SafeNet Driver, please refer to the workaround section: - The token is not recognized. - The token is not present in Adobe. Bypass: In your Adobe Acrobat Pro DC app. Go to the preferences of the signatures of the iDs and trusted certificates of ggt; Read more... Select digital identifiers/PKCS-11 Modules and tokens and tokens zgt; Click Attach the module to the PKCS-11 (/usr/local/lib/libetpkcs11.dylib) Now you'll see that your token is visible, as Adobe will be able to recognize it. If you need help with this detour, please feel free to contact our support team. In addition, we will be providing updates soon, with the new release of MacOS Drivers SafeNet. Install the PDF SIGNING Guide Download and install the AATL or CDS Certificate Install Adobe Root CA (BlueBeam Compatibility) CODE SIGNING Download and install the Code Signing Certificate Code Signing to Java (Token Based) articles/articles//2722672-code-signing-in-java-token-based-code-signing for Windows 7 and 8 (Token Based) Use these instructions to install customer software on your computer after you have received your hardware token from DigiCert. Whether you're providing your own hardware token or you need to send DigiCert to you with a secure E.V. code signing certificate, you need to install drivers for your computer to interact with the device. SafeNet Installation Help Don't Have SafeNetAuthenticationClient-x64.msi? able to download SafeNet Drivers from your account? Need help downloading the software? Please contact the support (support@digicert.com). Already there is Do you provide your own token? First, you need to contact the company from which you purchased your token for drivers. You then need to set up a certificate for the token. You can set the DigiCert EV signature certificate on a secure token. How to install a SafeNet client log into a DigiCert account and perform the following tasks: Note: Before you start your SafeNet authentication client, make sure your token is disabled (in other words, not connected to a USB port on your computer). Start the SafeNet Authentication Client program you downloaded. In safeNet Customer Authentication Settings, to Welcome to SafeNet Authentication Customer Installation Master Page, click Next to start the software installation process. On the Interface Language page, the list falls out, select the language for the interface, and then click Next. On the License Agreement page, read the license agreement, select I accept the license agreement, and then click Next. On the Folder destination page, select where you want to install SafeNet authentication client and then click Next. On the Custom Type page, select a typical installation type and then click on. On the master is ready to start installing the page, click Set. Installing the software can take a few minutes. On SafeNet Customer Authentication a page has been successfully installed, click Finish to exit the SafeNet Authentication Customer Setting. You have successfully installed SafeNet client software. Do you still need to change your SafeNet Token password? For instructions on how to change your password: password: safe net ikey 2032 driver download. safenet ikey driver v4.1.1.5. safenet ikey driver windows 10. safenet ikey driver 64 bit. safenet ikey driver 4.1.1.5. safenet ikey 2032 driver. safenet ikey 2032 driver for windows 10. safenet ikey 4000 driver
